

LEG SWELLING IS TOUGH, COMPRESSION THERAPY DOESN'T HAVE TO BE.

Sun Scientific's **Aero-Wrap™** is an easier, more comfortable way to effectively manage leg swelling and keep you mobile. With a slip-on design, hook and loop straps, and thin and flexible fabrics, Aero-Wrap™ brings the best in compression therapy.

The Aero-Wrap™ Compression System is a single-patient, reusable compression system designed to provide static pneumatic compression to the lower leg to treat a number of conditions. It's comprised of a compression wrap, a comfortable liner, and AeroGauge™, a hand pump that provides adjustable static pneumatic compression.

It is indicated to provide treatment for:

- Venous stasis ulcers
- Leg ulcers
- Chronic Venous Insufficiency
- Lymphedema

COMPRESSION WITH INDEPENDENCE, FREEDOM, AND DIGNITY

Self-Applied, Fully Inelastic Air Compression

Aero-Wrap provides a completely mobile, easy to apply, compression therapy solution — now patients can get compression treatment while continuing their daily lives.

Higher Static Stiffness Index for Better Working Pressures

Studies have shown, the efficacy of compression therapy depends mainly on the exerted pressure and on the stiffness of the material. Aero-Wrap and Aero-Wrap Flex have very high static stiffness, resulting in compression that effectively enhances the calf-pump.

All Day Wear

Aero-Wrap won't stretch, slip, or bunch, making it more comfortable & more effective than other static compression products. When swelling fluctuates, simply pump back to desired compression.

Easy To Apply

Aero-Wrap's patented design makes it simple to put on by yourself. Don't struggle with tight compression socks or complicated wraps.

Adjustable Pressure

The AeroGuage hand pump has three settings that let you adjust for the amount of compression that's right for you.

Flexible & Low Profile

Aero-Wrap fits under most pants and is made of lightweight materials that move with you — keeping you on the go.

Actual thickness of Aero-Wrap!

Comfortable

Aero-Wrap includes a thin, soft sock for added comfort but you can always wear it on top of your favorite socks.

aero wrap™

- Full compression toes to knee
- Inflated foot portion
- Maximum compression
- Ideal for patients with Lymphedema, foot swelling, foot edema, & below ankle venous ulcers

Comes in Two Styles
and Sizes S-XL for the Perfect Fit
(Unilateral & Bilateral Configurations)

aero **FLEX** wrap™

- Ankle to knee compression
- Elastic foot compression
- Maximum mobility
- Ideal for patients with Chronic Venous Insufficiency, venous leg ulcers
